

POOL ACID

HCL (HYDROCHLORIC ACID 30 -33%)

PRODUCT USE:

POOL ACID is used to maintain the pH of the swimming pool water between 7.2 and 7.4. The product can also be used to clean the electrodes of swimming pool salt chlorinators.

PRODUCT DESCRIPTION:

Appearance: Light yellow, fuming pungent liquid
S.G.: 1.12

DIRECTIONS FOR USE:

Maintain pH between 7.1-7.6. If higher add 100ml for every 10,000 litre of water. In case of a pH below 7.0 add Soda Ash.

Check the pH again one hour later after the addition of **POOL ACID**. If the pH has dropped below 7.0. Soda Ash has to be added.

When product is used to clean electrodes of salt chlorinators, a dilution of 1 : 5 with water is required. **Always add Acid to water, never add water to acid.**

Ref. No. 12/23 as per supplier

PRECAUTIONS:

- Keep out of reach of children.
- Product is corrosive and toxic by ingestion and inhalation, strong irritant to eyes and skin.
- Store in a cool, dry place, away from direct sunlight and any metal object. Handle with care.
